## CCS/CC2650: MPU

[sadasivam arumu...](#) *Intellectual 940 points*  
Community Member

**Part Number:** [CC2650](#)

**Tool/software:** Code Composer Studio

Does Memory protection works for CC2650.

Since, this thread:

<https://e2e.ti.com/support/wireless-connectivity/bluetooth/f/538/t/404370> showing MPU Related to cost constraints.

How could the memory be protected without using MPU.

As you can refer in that post, CC2650 doesn't support such MPU feature.

Yes,. If MPU not supported, how could the memory be protected?
