Part Number: LAUNCHXL-CC2650
Other Parts Discussed in Thread: CC2650

Hi Sir,

I am working on CC2650 Launchxl using Simple_peripheral(app and stack) project. Able to data transfer with BLE Central(BLE Apk). Now, I would like to go in custom basis for my development board. For that, When I press Button(HWI), the SWI context has to move on Stack context. ie,. BLE Advertising packets when button trigger. Can you guide me in this regard.

You can use the following code to start advertising when interrupt is triggered.

uint8_t advertEnabled = TRUE;

GAPRole_SetParameter(GAPROLE_ADVERT_ENABLED, sizeof(uint8_t),

&advertEnabled);
